EMERGING OPPORTUNITIES IN CHINA HEALTHCARE MOTIVATES THE DORENFEST GROUP TO FORM A CHINESE SUBSIDIARY

Chicago, Illinois, December 18, 2006 – The Dorenfest Group announced today that it has formed The Dorenfest China Healthcare Group, a Shanghai based company providing a variety of improvement services to the China healthcare system. The Dorenfest Group, a healthcare investment and consulting service firm offering services to help support a positive world future, will invest its skill, technology and capital in well defined projects to help China to implement improvements in its healthcare system. Its services in China include:

- Implementing The Dorenfest China Healthcare Group “model hospital” program
- Hospital management and work process improvement
- Hospital I.T. consulting
- Hospital contract management
- Hospital ownership
- Healthcare investment advisory services
- Healthcare market entry services
- Healthcare supplier consulting
- Healthcare insurance consulting
- Healthcare market research services
- Healthcare education symposiums and seminars

Sheldon I Dorenfest, President and Chief Executive Officer of The Dorenfest Group, said “Over the last 2 years, we have conducted a comprehensive study of the healthcare industry in China. We visited 17 cities, met with over 75 hospitals, met with local, provincial and national government

health personnel and discussed industry needs with a number of companies and experts serving the China healthcare industry. From this market study, we determined that healthcare in China is in a period of tremendous change and improvement and that our skills are particularly suited to help China take its next steps in healthcare system improvement. We look forward to partnering with China as it pursues its goal of improving healthcare for its people.”

In addition to providing services to a group of consulting clients, The Dorenfest China Healthcare Group is now in the process of reviewing candidates to implement our “model hospital vision”, developing partnering relationships to support the delivery of our services and reviewing software systems to define the best software available in China for partnering with us to implement new I.T. systems for our China hospital clients.

The Dorenfest China Healthcare Group vision of a “model hospital” includes the following characteristics:

- Provides improved quality of care to its patients
- Operates at a highly efficient level through effective use of I.T. systems and better work processes
- Offers its services to patients at an affordable cost
- Creates a highly satisfied patient population with the patients observing a noticeable improvement in the services and treatments provided by the hospital
- Utilizes appropriate digital technology to create a state of the art “digital hospital”

The Dorenfest China Healthcare Group would like to select a project for its “model hospital” effort. Criteria for the selection of this project will include the following:

- A friendly, supportive local government
- A capable hospital management team
- Supportive physicians and employees

Once this project proves itself, The Dorenfest China Healthcare Group will replicate the work done in that project to create other “model hospitals” throughout China. We will focus on making the characteristics of the “model hospitals” consistent with China’s healthcare reform goals so as the model accomplishes its objectives, it can become part of a national program for Chinese healthcare improvement.

About The Dorenfest Group

The Dorenfest Group is a healthcare investment and consulting firm offering a variety of improvement services to help support a more positive world future. Its founder, Mr. Sheldon I.

Dorenfest, is one of the world's foremost experts in healthcare systems improvements. He has personally consulted with the governments of the USA, France, England, Australia and Canada on a variety of healthcare issues. Mr. Dorenfest has managed a series of successful healthcare improvement businesses and has personally consulted with over 300 hospitals on a worldwide basis to help them strategize, select and implement information systems. He has also worked with over 200 H.I.T. suppliers to help them improve their understanding of the H.I.T. market, shape new products and strategies and better serve their customers. The Dorenfest Group is a leading source of knowledge about the worldwide healthcare industry and its improvement needs. Providing a variety of consulting services throughout the world, The Dorenfest Group focuses its services on improving healthcare while reducing costs by helping clients to improve work processes, management systems and quality of medical care through better use of information technology.
